SUMMARY

Recent computer engineering graduate eager to learn and quickly adapt to new technologies. Experienced in back-end development projects, with a strong motivation to expand knowledge and skills. Detail-oriented and organized, excels in teamwork and collaboration with strong problem-solving, communication, and coordination abilities. Successfully contributed to multiple projects, aiming to build a comprehensive knowledge base in the software industry through diverse experiences.

SKILLS

C/C++: Good knowledge in C, C++ and Object-Oriented Programming

HTML-CSS: Proficient in web development.

R programming language: Competent in R for statistical computing and graphics.

Java: Intermediate knowledge of Java programming.

C#: Proficient in C# and .NET framework.

.Net Maui: Experience with .NET MAUI for cross-platform development.

RabbitMQ: Good understanding of RabbitMQ for message brokering.

JavaScript: Proficient in Javascript.

CQRS: Familiar with CQRS (Command Query Responsibility Segregation) pattern.

Entity Framework (EF) Core: Proficient in Entity Framework Core for database management.

ASP.NET Core: Proficient in ASP.NET Core for building web applications.

MongoDB: Familiar with MongoDB for NoSQL database solutions.

SQL: Proficient in SQL for relational database management.

Redis: Good experience with Redis for in-memory data structure store.

Onion Architecture: Experienced in using Onion Architecture in projects.

Communication skills: Strong ability to collaborate effectively with others in professional settings, demonstrated through project work.

Multitasking: Capable of completing tasks within deadlines across multiple projects simultaneously.

Problem-solving: Skilled in generating quick solutions to challenges encountered in projects.

Teamwork: Works collaboratively and harmoniously within multidisciplinary teams.

Languages: English – professional knowledge; Turkish – native; French – beginner.

PROFESSIONAL EXPERIENCE

PATH Product & Software House, Engineer Intern

Istanbul/Türkiye, 08/2023–11/2023

Contributed to the development of back-end solutions for software products requested by consulting firms, actively participating in multiple projects and producing innovative solutions to meet their needs.

Bilge Adam Technology, Engineer Intern

Istanbul/Türkiye, 07/2022–08/2022

Engaged in documentation tasks for the Fow-CRM application and took on a back-end role in a special project designed for interns.

EDUCATION

Çukurova University, B.Sc. in Computer Engineering, 3,07 GPA

Adana/Türkiye 2018–2023

İçel Anadolu High School, High school

Mersin/Türkiye 2013–2017

CERTIFICATES

Diplôme D'Études En Langue Française – Delf A2 July, 2021

Asp.Net Core + Redis/In-Memory – Instructored by Fatih Çakıroğlu Udemy April/2024

Entity Framework Core – Instructored by Fatih Çakıroğlu Udemy July/2024

PROJECTS

Mobile app for Çukurova University, Conducted a senior project under the supervision of Prof. Dr. Umut Orhan at Çukurova University, aimed at assisting Çukurova University students.

Erasmus App (ErasmusCare) for Çukurova University Students, Designed in consultation with Dr. Havva Esin Ünal, a project aimed at assisting Çukurova University students applying for the Erasmus program.

Fow-CRM, I worked on the Fow-CRM application, where I was responsible for code adjustments to improve project functionality and contributed to documentation efforts to ensure clarity and usability

Photo-Utility, I was directly involved in writing back-end code to implement core functionalities and managed database merge processes to ensure seamless integration and data consistency.
